

**en: Indication for use**

Medium for culture of embryos from fertilization to the blastocyst stage.

**Contraindications**

G-TL™ contains gentamicin. Do not use in patients with known hypersensitivity/allergy to the component.

**Product Description**

SUPPLEMENTED WITH HSA

G-TL is a bicarbonate buffered medium containing human serum albumin, hyaluronan and gentamicin as an antibiotic agent.

Ready to use after equilibration at +37 °C and 6 % CO<sub>2</sub> atmosphere.

The summary of safety and clinical performance can be found at www.vitrolife.com

**Storage instructions and stability**

Store dark at +2 to +8 °C.

G-TL is stable until the expiry date shown on the container labels and the LOT-specific Certificate of Analysis.

**Media bottles can be used for up to two weeks after first opening, use aseptic technique and minimize the time outside the refrigerator. Record the opening date on the bottle. Discard excess media no later than two weeks after first opening.**

**US: Media bottles should not be stored after opening. Discard excess media after completion of the procedure.**

**Directions for use**

The product shall be used by an IVF professional.

The patient target group is an adult or reproductive-age population that undergoes IVF treatment or fertility preservation.

To use G-TL with time-lapse devices follow the manufacturer's instructions for use.

The following is the general procedure for embryo culture using G-TL.

Use a pre-steriled sterile tip and place an appropriate number of droplets of G-TL into the dish. Immediately cover the drops with OVOIL™ to avoid evaporation. Place the dish in the incubator at 6 % CO<sub>2</sub> and +37 °C. Dishes should be equilibrated for no less than 6 and no more than 18 h before use.

Following fertilization, wash the embryos before placing into G-TL. To avoid depletion of nutrients add minimum approximately 10 µl G-TL per embryo should be used. Return the dish to the incubator immediately. Embryos can be transferred to the uterus in EmbryoGlue® or in G-TL (not cleared for embryo transfer in the US).

**Specifications**

Aseptically filtered

Mouse Embryo Assay, 1-cell [% embryos developed to expanded blastocyst at 96 hours] ≥ 80

Bacterial endotoxin (LAL assay) [EU/ml] < 0.25

pH tested

Osmolality tested

LOT specific test results are available on the Certificate of Analysis provided with each delivery.

**Precautions**

Discard product if bottle integrity is compromised. Do not use G-TL if it appears cloudy.

G-TL contains human serum albumin.

Caution: All blood products should be treated as potentially infectious. Source material from which this product was derived was found negative when tested for antibodies to HIV, HBs, HCV, and HTLV-1 and non-reactive for HbsAg, HCV RNA and HIV-1 RNA and syphilis. No known test methods can offer assurance that products derived from human blood will not transmit infectious agents.

To avoid contamination Vitrolife strongly recommends that media should be opened and used only with aseptic techniques.

The risk of reproductive toxicity and developmental toxicity for IVF media, including Vitrolife's IVF media, have not been determined and are uncertain.

Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established. Not for injection.

Discard the product according to standard clinical practice for medical hazardous waste when the procedure is finished.

**Symbols glossary**

\*Medical devices - Symbols to be used with information to be supplied by the manufacturer (ISO 15223-1:2021).

≥ 80	细菌内毒素 (LAL试验) [EU/ml]	< 0.25
经OVI检测		
经透压测试		
该批次的测试结果可在每次交付时提供的分析证书上获得。		

**注意事项**

如果瓶子完整性受损, 请丢弃产品. 如果出现浑浊请勿使用。

G-TL含有血清白蛋白。

警告:所有血液成分都应被视为可能具有传染性物质。在检测 HIV, HBC, 和 HTLV-1抗原时, 发现阳性品为来源材料为阴性, 并且检测 HIV-RNA/HIV-1 RNA和HIV-2 RNA为阴性。没有已知的测试方法可以确认从人血中提取的产品不会传播感染。

为了避免污染, Vitrolife强烈建议仅在无菌技术下打开和使用培养液。IVF培养液(包括Vitrolife的IVF培养液)的生殖性和发育毒性风险尚未确定是否明确。

对于该产品的任何严重事故都应报告给制造商和用户/患者所在国的监管部门。

不能作为注射剂使用。

程序完成后, 按医疗危险废物的标准临床实践丢弃产品。

本产品建立与Vitrolife公司的IVF系列培养液配套使用。

产品需遵守所示条件储存下。

避免使用产品母液。

警告:美国(法律)限制本设备只能由受过其使用培训的医生或执业销售员或按其指示销售(仅限Rx)。

RUSSIA

**ru: Показания к применению**

Среда для культивирования эмбрионов с момента оплодотворения до стадии бластоциты.

**Противопоказания**

Среда G-TL™ содержит гентамицин. Не используйте для пациентов с установленной повышенной чувствительностью или аллергией на этот компонент.

**Описание продукта**

С ДОБАВЛЕНИЕМ ЧАСА

G-TL представляет собой среду с бикарбонатной буферной системой, содержащую человеческий сывороточный альбумин, гиалуроновую кислоту и гентамицин в качестве антибактериального агента.

Для применения после оплодотворения в среде с содержанием 6 % CO<sub>2</sub> при +37 °C.

Краткое описание безопасности и клинических характеристики можно найти на сайте www.vitrolife.com

**Условия хранения и стабильность**

Хранить в темном месте при температуре от +2 до +8 °C.

Среда G-TL остается стабильной от истечения срока годности, описанного на этикетке.

Сроки хранения и стабильность определены с момента истечения срока годности.

Среда G-TL не подлежит хранению после дозирования.
