

en: Indication for use

Medium for gradient sperm separation.

Contraindications

Non known.

Product Description

All SpermGrad™ media are bicarbonate and HEPES buffered media containing silane-coated, colloid silica particles.

SpermGrad is available as:

-SpermGrad REF 10102 (30 mL) and 10099 (125 mL). Media for dilution into desired concentrations. For use after dilution with G-IVF™ PLUS or SpermRinse™.

-SpermGrad REF 10138 (2x30 mL), 10238 (30 mL), 10338 (30 mL), 10139 (2x125 mL), 10239 (125 mL) and 10339 (125 mL) containing: Gradient solutions SpermGrad Upper Layer and SpermGrad Lower Layer. Ready to use solutions for gradient sperm separation.

SpermGrad is available as while the media for dilution and sperm wash, such as G-IVF™ PLUS or SpermRinse, contains gentamicin as an antibacterial agent.

The summary of safety and clinical performance can be found at www.vitrolife.com.**Storage instructions and stability**

Store dark at +2 °C.

SpermGrad is stable until the expiry date shown on the container labels and the LOT-specific Certificate of Analysis.

Media bottles should not be stored after opening.

Discard excess media after completion of the procedure.

Directions for use

The product shall be used by an IVF professional.

The patient target group is an adult or reproductive-age population that undergoes fertility treatment.

Dilution: SpermGrad REF 10099 and 10102. Mix SpermGrad with G-IVF PLUS or SpermRinse in separate tubes to obtain 90% and 45% stock solutions for 90% stock dilution. For 45% stock solution mix 4.5 mL SpermGrad with 5.5 mL G-IVF PLUS or SpermRinse. Mix the solution thoroughly. Store in sterile non-toxic tubes or sterile tissue culture flasks. Label with date and refrigerate until use.

SpermGrad REF 10138, 10238, 10338, 10139, 10239 and 10339. Ready to use.

Preparation of sample: Allow the solutions to reach ambient temperature before use.

Layer the gradient in a sterile, conical centrifuge tube marked with patient ID. Insert 1.5 mL of 90 % solution (SpermGrad Lower Layer) into the tube first and then slowly 1.5 mL of 45 % solution (SpermGrad Upper Layer) on the top of it. Finally, the semen is gently layered on the top. Centrifuge the tube for 20 minutes at 300–600 g. Remove the two top layers. Transfer the sperm pellet with as little of the 90 % solution (SpermGrad Lower Layer) as possible to a sterile tube. Add 0.5 mL of equilibrated G-IVF PLUS or SpermRinse. Centrifuge for 10 minutes at 300–600 g. Discard the supernatant and repeat the wash. Re-suspend the pellet in 1 mL of equilibrated G-IVF PLUS or SpermRinse. Assess the sample for motility and concentration. Inseminate according to normal laboratory protocols.

Specifications

Aseptically filtered

Bacterial endotoxins (LAL assay) [EU/ml] < 0.5

Human sperm recovery assay (recovery rate after gradient separation) [%] ≥ 25

Mouse Embryo Assay not performed

pH tested

Osmolality tested

LOT-specific test results are available on the Certificate of Analysis provided with each delivery.

Precautions

Discard product if bottle integrity is compromised. Do not use SpermGrad if it appears cloudy.

Re-use may result in microbiological contamination and/or product changes in the product.

To avoid contamination Vitrolife strongly recommends that media should be opened and used only with aseptic technique.

The risks of reproductive toxicity and developmental toxicity for IVF media, including Vitrolife's IVF media, have not been determined and are uncertain.

Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the competent authority of the Member State in which the user and/or patient is established.

Not for injection.

Discard the product according to standard clinical practice for medical hazardous waste when the procedure is finished.

产品有效期及储存条件

产品有效期：生产之日起36个月。

储存条件：避光，2°C~8°C。

运输条件：在运输过程中温度可以超过8°C，但不超过12°C，且最长时间不超过72小时。

由知名的公司或生产商提供的包装标签和该产品批号的质检分析报告上显示的日期为产品的有效期限。

SpermGrad™在包装标签上，和该产品批号的质检分析报告上显示的日期为产品的有效期限。

本产品为一次性使用，培养液瓶打开后不再继续储藏。使用后丢弃剩余产品。

生产日期：见标签

使用期限：见标签

使用方法

此产品应由IVF专业人员使用。

患者或目标人群是接受生育治疗的成人或育龄人群。

稀释：SpermGrad™REF 10102 and 10099:

将SpermGrad™G-IVF PLUS或SpermRinse™在单独的试剂盒中稀释到90%和45%的浓度。液体量根据不同的SpermGrad™和G-IVF PLUS或SpermRinse™的容量而定。

将SpermGrad™G-IVF PLUS或SpermRinse™在单独的试剂盒中稀释到45%的浓度，液体量根据不同的SpermGrad™和G-IVF PLUS或SpermRinse™的容量而定。

将SpermGrad™REF 10138 (2x30 mL), 10238 (30 mL), 10338 (30 mL), 10139 (2x125 mL), 10239 (125 mL) and 10339 (125 mL) containing: Gradient solutions SpermGrad Upper Layer and SpermGrad Lower Layer. Ready to use solutions for gradient sperm separation.

SpermGrad™REF 10102 (30 mL) and 10099 (125 mL). Media for dilution into desired concentrations. For use after dilution with G-IVF™ PLUS or SpermRinse™.

-SpermGrad REF 10138 (2x30 mL), 10238 (30 mL), 10338 (30 mL), 10139 (2x125 mL), 10239 (125 mL) and 10339 (125 mL) containing: Gradient solutions SpermGrad Upper Layer and SpermGrad Lower Layer. Ready to use solutions for gradient sperm separation.

SpermGrad™REF 10102 (30 mL) and 10099 (125 mL). Media for dilution into desired concentrations. For use after dilution with G-IVF™ PLUS or SpermRinse™.
